

ANTANOM

AR STORYBOOK

Murut Warrior Storytelling

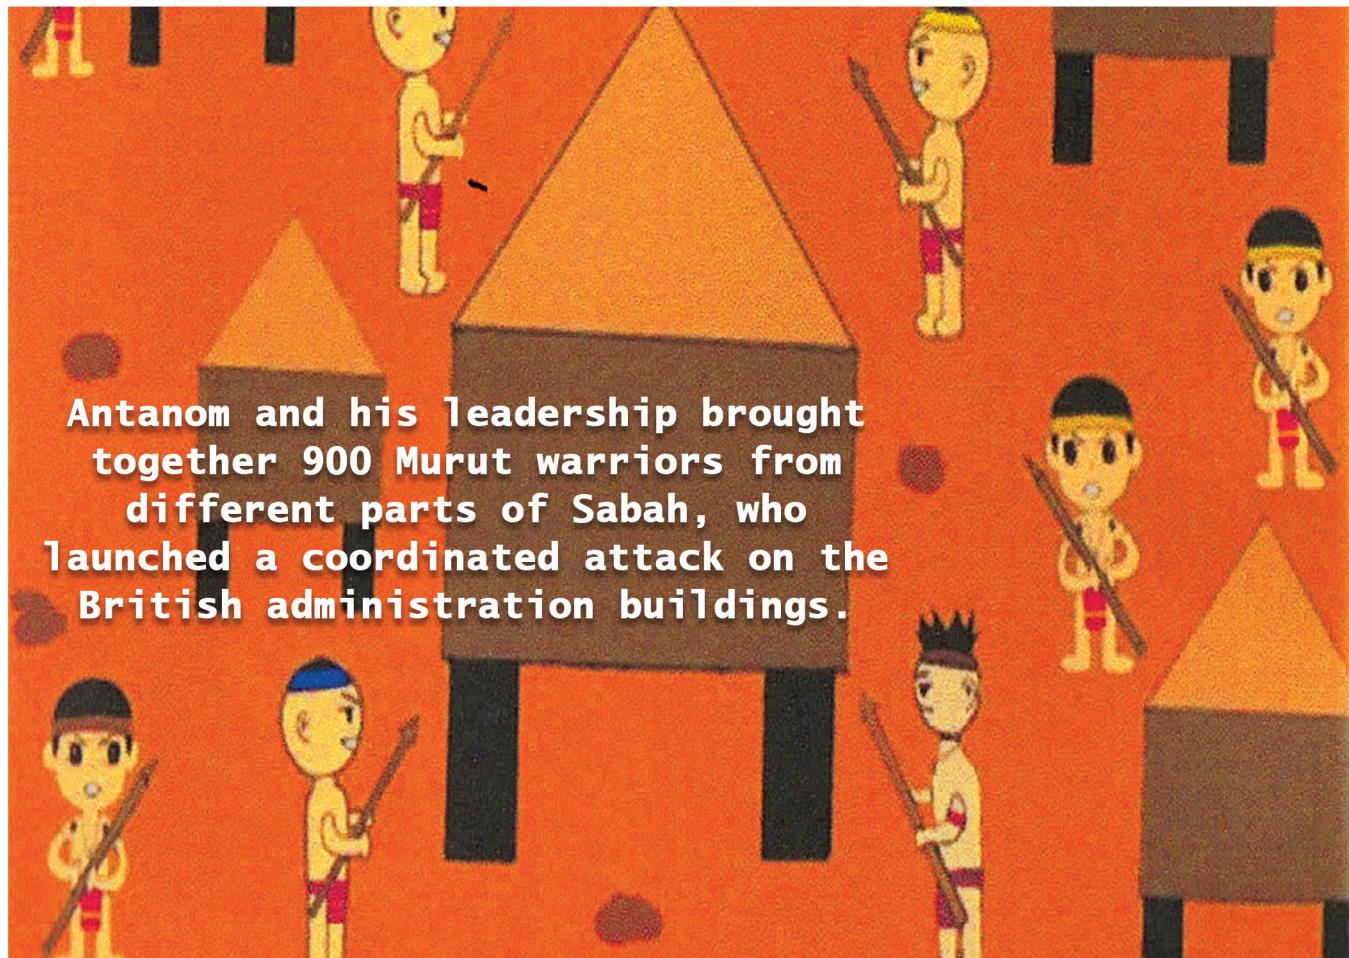

Get ready to meet Antanom, the legendary Murut warrior who was feared and respected by all who knew him. It's worth noting that during his time, Borneo was under the control of the British, specifically the BCNBC (British Chartered North Borneo Company).

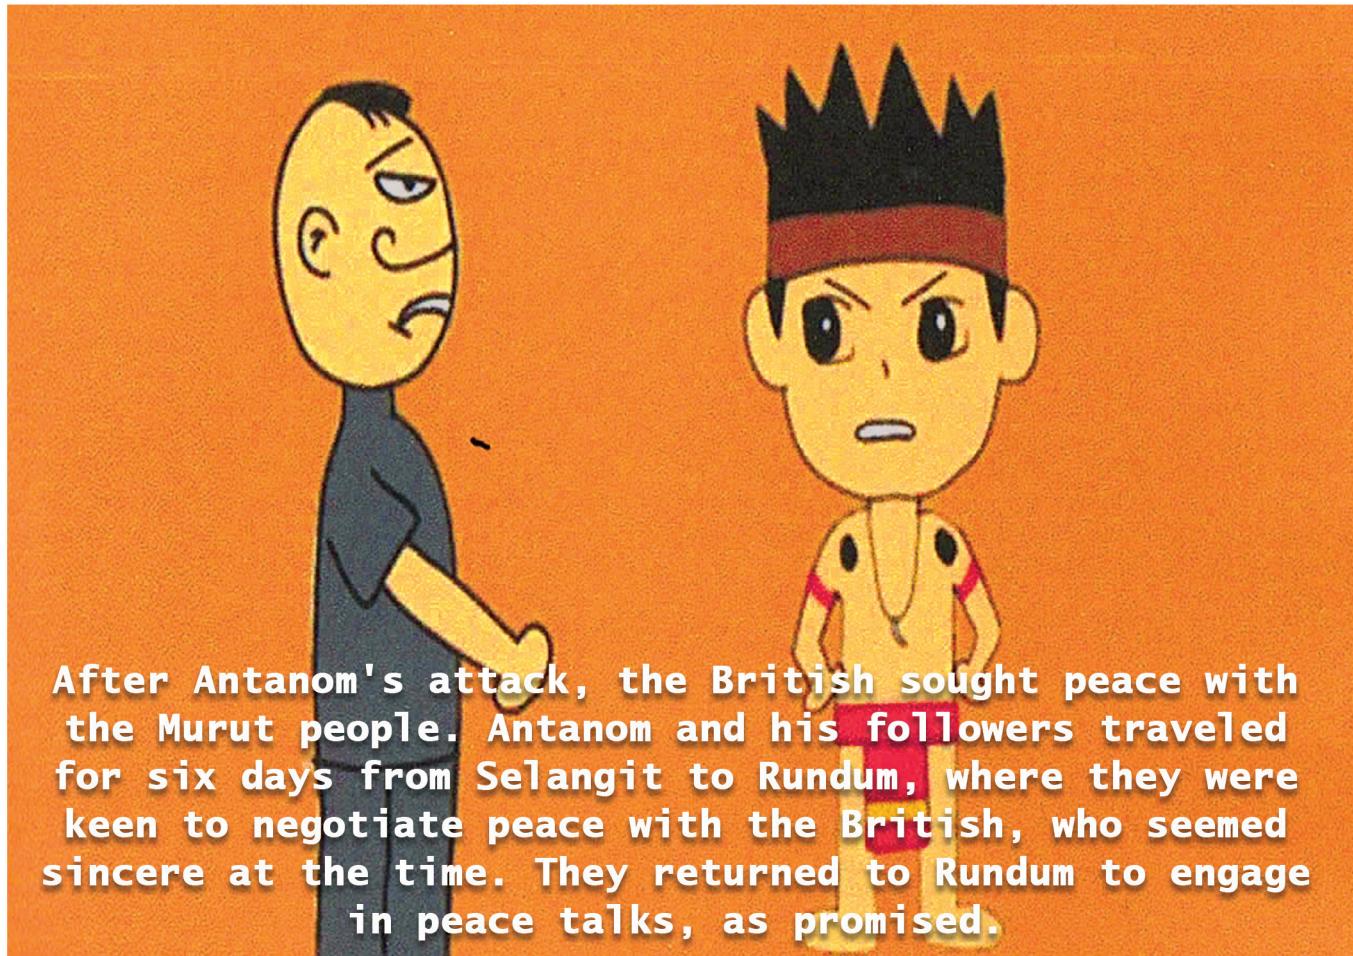

During the British colonial rule in Borneo, the Murut people were burdened with numerous responsibilities, fines, and fees imposed by the authorities.

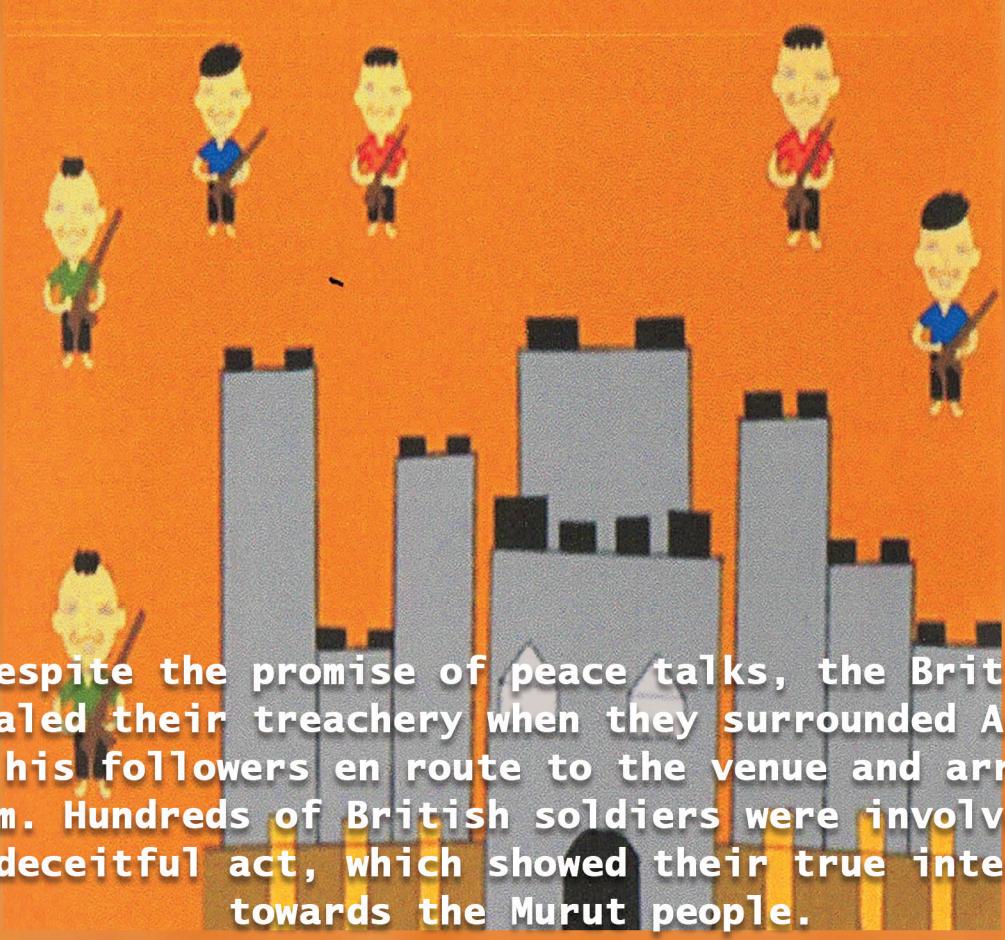

The oppressive policies of the British administration prompted Antanom and his fellow Murut warriors to rise up in rebellion and launch attacks against their oppressors.

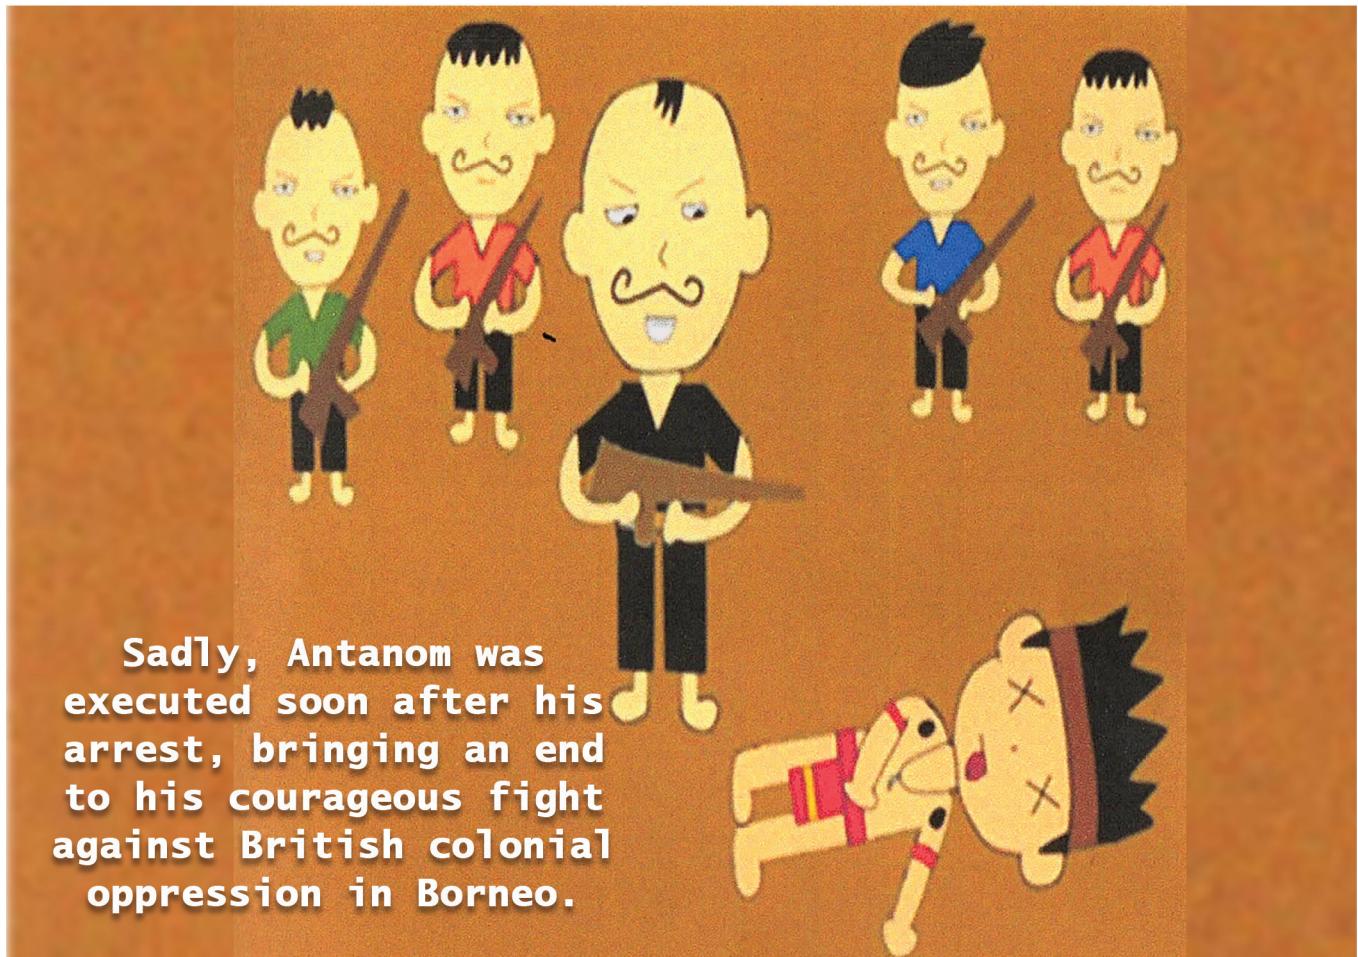

Antanom and his leadership brought together 900 Murut warriors from different parts of Sabah, who launched a coordinated attack on the British administration buildings.

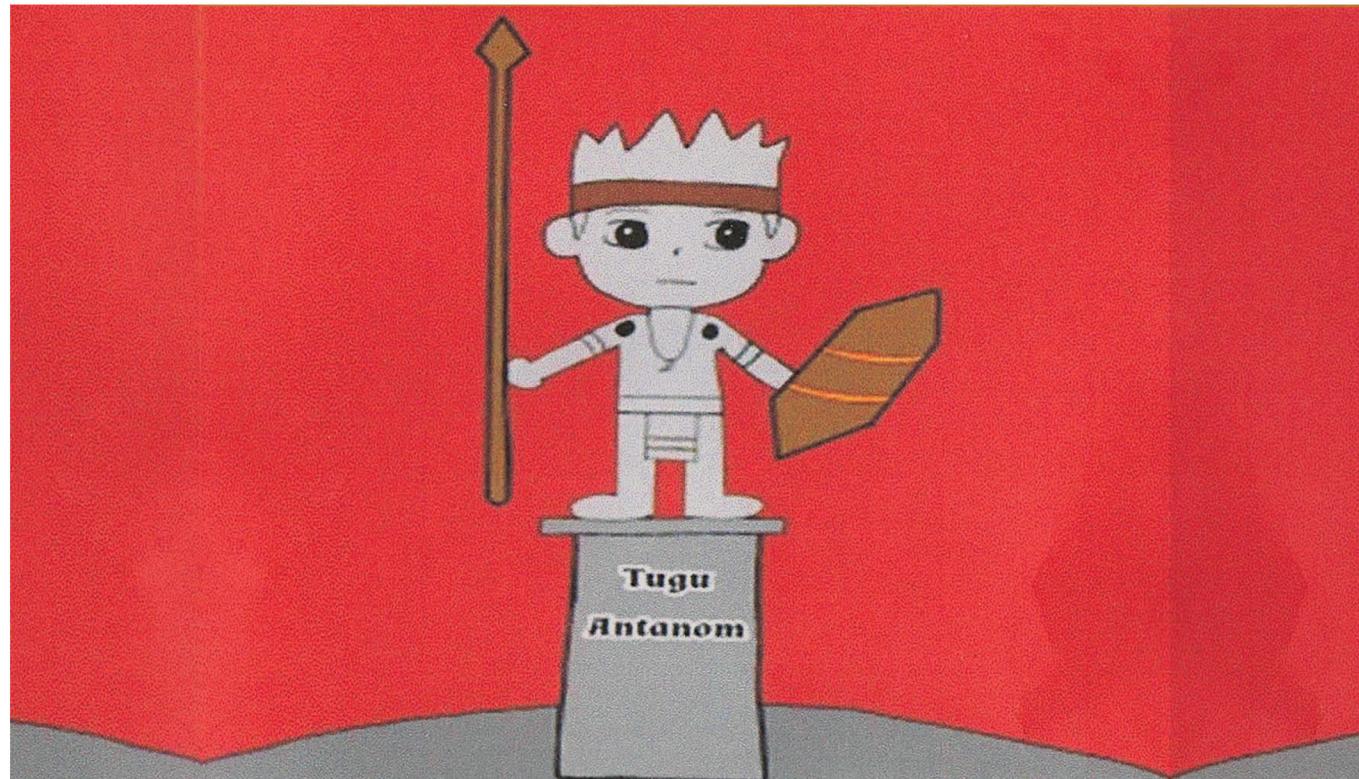

After Antanom's attack, the British sought peace with the Murut people. Antanom and his followers traveled for six days from Selangit to Rundum, where they were keen to negotiate peace with the British, who seemed sincere at the time. They returned to Rundum to engage in peace talks, as promised.

Despite the promise of peace talks, the British revealed their treachery when they surrounded Antanom and his followers en route to the venue and arrested them. Hundreds of British soldiers were involved in the deceitful act, which showed their true intentions towards the Murut people.

**Sadly, Antanom was
executed soon after his
arrest, bringing an end
to his courageous fight
against British colonial
oppression in Borneo.**

As a tribute to his bravery and resistance against British colonialism, a statue has been erected to honor Antanom and his struggle for the Murut people.

A decorative border of tropical leaves and flowers in red, yellow, and green colors frames the central text area.
